

BIOL3960 : Internship in Biology

A supervised, practical work experience in the student's area of interest performed under a trained professional in a chosen field of biology for a minimum of 40 hours per credit. By exposure to a variety of skills and settings the student gains an understanding of various professions in biology and obtains practical experience in his/her area of interest. May be repeated for credit.

Credits 1-4

Prerequisites

Completed application form including work supervisor consent, and instructor's permission.
